SAGAR VERMA

SOFTWARE ENGINEER

+917078636216 sagar.karanveer1@gmail.com

OBJECTIVE

Targeting challenging opportunities in Backend Software Engineering, Python Development, Django/FastAPI Development or AI-Driven Application Development across diverse industries.
Location Preference: Delhi NCR, Jaipur, (open to relocate)

PROFILE SUMMARY

- Software Engineer with nearly 2 years of experience in designing and developing scalable backend applications using Python, Django REST Framework, FastAPI, PostgreSQL, Redis, and Kafka across government digital transformation and enterprise technology projects.
- Expertise in building RESTful APIs, automation solutions, payment integrations, real-time communication systems, and database-driven applications.
- Hands-on experience delivering critical solutions for government initiatives, including industrial development, education & public service platforms.
- Knowledgeable about emerging AI technologies with practical exposure to LLM-powered applications, RAG pipelines, vector databases (pgvector) & prompt engineering.

WORK EXPERIENCE

Associate Software Engineer | Primus Partners Solutions
2024 – Present **Delhi, India**
MPIDC (Single Window System)

- Designed backend services for MPIDC (Madhya Pradesh Industrial Development Corporation) utilizing Python, Django REST Framework, PostgreSQL, ORM & SQL, including Razorpay payment gateway integration & Kafka-driven workflow processing.
- Built and maintained RESTful APIs for government workflow applications using Django REST Framework and PostgreSQL, while producing API documentation through Swagger and supporting cross-department system integrations.

C-GEM

- Designed and implemented a real-time group communication platform supporting **1,000–2,000 concurrent users** using Flask-SocketIO.
- Developed backend services and REST APIs using Flask and PostgreSQL, enabling secure and scalable application functionality.
- Established role-based access control mechanisms for multiple stakeholder groups, including NGOs, Investors & Developers, ensuring controlled access to platform resources.

INTERNSHIP

Proposal Analyst Intern | SDLC Corp
2023 – 2024 **Noida, India**

- Evaluated business & technical requirements, translating them into backend specifications & scalable Python-based solutions while collaborating with cross-functional teams.
- Developed APIs and backend components in accordance with functional requirements, contributing to solution design, technical documentation & implementation planning.

PROFESSIONAL PROJECTS

MPIDC (Single Window System) | Python, Django, ReactJS, PostgreSQL

- Architecting backend services for the MPIDC Single Window System using Python and Django REST Framework while delivering RESTful APIs & supporting government processes.
- Managing data operations through PostgreSQL using both ORM and optimized SQL queries, ensuring efficient backend functionality, system integration, and application performance.

PERSONAL PROJECTS

AI Assistant & RAG Pipeline | Python, OpenAI SDK, Llama, Requests

- Developed an AI-powered chatbot leveraging OpenAI-compatible APIs (Llama/Gemini) & implemented Retrieval-Augmented Generation (RAG) concepts including text chunking, embedding generation, and vector search integration using PostgreSQL with pgvector.
- Designed Python-based AI workflow integrating OpenAI-compatible APIs, tool-calling skills, prompt orchestration & retrieval mechanisms to enable conversational interactions.

CORE COMPETENCIES

- Backend Application Development
- Python Software Engineering
- Django REST Framework Development
- FastAPI Application Development
- RESTful API Design & Integration
- Microservices & Distributed Systems
- Workflow Automation & Process Digitization
- Real-Time Communication Systems
- Database Design & Performance Optimization
- Event-Driven Architecture (Kafka)
- AI/LLM Application Development
- Retrieval-Augmented Generation (RAG)

TECHNICAL SKILLS

- **Programming Languages:** Python, SQL
- **Frameworks & Libraries:** Django, FastAPI, Plotly
- **Databases:** PostgreSQL, pgvector
- **Messaging & Caching Technologies:** Kafka, Redis
- **Cloud & DevOps Tools:** AWS, Git

EDUCATION

Master of Business Administration (MBA), Marketing
Dayalbagh Educational Institute, Agra | 2021 – 2023

Bachelor of Vocation (B.Voc.), Automobile
Dayalbagh Educational Institute, Agra | 2018 – 2021

CERTIFICATIONS

- **Clean Code - Udemy**
- **Zero to Hero in SQL: SQL for Data Analytics - Udemy**

NOTABLE ACCOMPLISHMENTS

- Delivered backend solutions for multiple government digital transformation projects, contributing to process modernization, workflow automation, and improved citizen and stakeholder service accessibility.
- Engineered a scalable real-time chat platform supporting 1,000–2,000 concurrent users, enhancing collaboration through secure role-based access and low-latency communication.
